Detailed Action

Claims Rejection - 35 U.S. C. 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Su, U. S. Patent No. 6,388, 253.

Su (253) discloses the following;

- (a) Linking (combining) stepper focus data and critical dimension (CD) data from a plurality of reference samples and generating a CD value from the analysis of the linked data, as recited in claims 1,10,12, and 19. See Column 3, line 52-67; Column 4, line 1-11; and Column 10, line 26-42;
- (b) Establishing a library of reference SEM waveforms and images using various stepper focus settings, as recited in claims 2-7,11, and 13-18. See Column 4, line 12-67; Column 5, line 1-57; and Column 10, line 43-54;
- (c) Storing the reference waveform and image data, and generating the optimum CD value using computer software-implemented data base system 350, as recited in Claims 20-26. See Column 5, line 58-65; and Column 8, line 31-65.
